

TABLE 0.1 Kingdoms in the Linnaean Classification System

Kingdom		Cell Type	Description
Monera	Archea	Prokaryotes	Single celled, differ in genetics & chemistry
	Bacteria		Single celled, includes the cyanobacteria
Protista		Eukaryotes	Single celled, more complex cells
Fungi			Multi-celled
Plantae			Multi-celled, photosynthetic
Animalia			Multi-celled, ingest organics

Note: Lab 6 contains a discussion of the variety of taxonomic classification systems in use today, and why the particular system shown in Table 0.1 is used for this course.
